

## Environmental or Occupational Health Specialist:

EnDyna ([www.endyna.com](http://www.endyna.com)) has an immediate opening for a full time Environmental, Public Health, or Occupational Health Specialist (EHS). EnDyna supports numerous federal agencies on multi-year contracts by managing projects, collecting and analyzing data, researching best practices for regulatory compliance, producing policy papers and guidance documents, developing methods and tools, preparing communications documents, and supporting scientific meetings. Specifically, work on one or more contracts from the U.S. Department of Health and Human Services (including NIH, CDC), U.S. Environmental Protection Agency, U.S. Department of Defense, U.S. Department of Labor (including OSHA), and other clients. The EHS will be staffed on multidisciplinary project teams under the direction of Project Managers.

This position provides an excellent opportunity for professional growth and increased responsibility. This position requires, at a minimum, proficiency in environmental, public health, or occupational health sciences, technical aptitude to research new topics, attention to detail in all work products, willingness to learn and adapt to client preferences, and the ability to work on multiple projects. Working knowledge of environmental, health and/or safety regulations is preferred. Prior experience with Environmental Management Systems (EMS) and/or environmental regulatory compliance auditing is a plus. Prior experience with occupational safety and health compliance also is a plus. Analytical skills in presenting summary data strongly preferred. Solid written and oral communication skills are necessary for client exposure.

The successful candidate will manage his/her own time and resources well and align with EnDyna's culture of professional excellence. The primary place of work will be EnDyna's office headquarters in McLean, Virginia (currently Metro-bus accessible and Metro-train accessible). Free covered parking is available. The EHS will commute occasionally to government customers' offices in Greater Washington DC area. Occasional travel may be required.
